

## Baltimore SCIART 2025

### Mellon Foundation-Supported Summer Research Program for Undergraduate Students at the Interface between Science and Art

The Baltimore SCIART program is a 9-week summer research opportunity for undergraduate students to explore the interface between science and art. Applicants should be (1) undergraduate students pursuing science/engineering majors with strong interests in the arts OR arts majors with science/engineering experience, (2) maintaining a GPA of 3.0 or greater, and (3) interested in the chemistry, biology, materials science, and engineering aspects of art conservation science.

*Tentative program dates are June 6<sup>th</sup> through August 7<sup>th</sup>.*

**The application for SCIART 2025 will open on February 3, 2025.**

**Review of applications will begin on March 1, 2025 and continue until all available positions are filled.**

**To learn more (and apply), please visit:**

<https://sciart.umbc.edu>

Program benefits include:

- Collaborative research experience mentored by UMBC research faculty as well as scientists and conservators from the Walters Art Museum
- Professional training workshops
- External seminars presented by experts in conservation and/or conservation science
- Field trips to conservation science departments at the Winterthur Conservation Institute in Delaware, the National Gallery of Art in Washington DC, and the Walters Art Museum in Baltimore
- A stipend of \$5500 for the 9-week program
